# 17:00 - 20:00 - FSDI 104 Session #1 Ch 35

- Object literal is a collection of data in one element
- Anonymous object is a object without a variable name declaration.
- Use loops to travel the arrays.***
- length is a property that returns the number of elements in an array.**
- Access to the objects attributes using the **.attribute** or ["attribute"].

This is for the assignment.

- Add the pets in the pets array.

## pets array

| pet1 | pet2 | pet3 | pet4 |
| --- | --- | --- | --- |

| | | |
| --- | --- | --- |
| - name: "Scooby"<br>- age: 50<br>- breed: "Dane"<br>- gender: "Male"<br>- service: "Grooming"<br>- owner's name: "Shaggy"<br>- contact phone: "555-555-555 | - name: "Scrappy"<br>- age: 40<br>- breed: "Mixed"<br>- gender: "Male"<br>- service: "Grooming"<br>- owner's name: "Shaggy"<br>- contact phone: "555-555-555 | - name: "Test"<br>- age: 99<br>- breed: "Test"<br>- gender: "Test"<br>- service: "Test"<br>- owner's name: "Test"<br>- contact phone: "555-555-555 |

Anonymous object
