17:00 - 20:00 - FSDI 101 Session #2 Ch 35

- **HTLM**

<h1><h1>

- **CSS**

property:value;

- We have three types of CSS:
  1. Inline
  2. internal
  3. external
- We have three types of selectors.

  .classname

  #idname

  tagname (<p> <h1> <h2><button>)

Example of internal CSS

```
<head>
<!-- internal CSS-->
    <style>
        /* CSS zone
        selector{
         property : value ;
        }
        */

    </style>
</head>
<body>

....
```
